Features

DIY
Xplore has been designed in such a ways so that you can **Do It Yourself**

It gives you the entire control over managing and creating a product catalog without any coding or DTP expertise

Simply add Product information and get started

Paper to digital
With Xplore it is simple to create an interactive product catalog all by yourself.

Simply add product images, classify product by category, add content and

Voila! Your catalog is ready

Attractive User Interface
Attractive and intuitive user Interface that enhances the catalog browsing experience and thus enabling to increase product and brand awareness.

Customers gets the best self-help experience similar to online where they can browse the product at their comfort, know the price, read description, short list the product.

Why Xplore-Digital Catalog **Wins Over** Printed Catalog

- Most importantly it saves environment so you don't need to print every time when there is new product or any modification

- Its reusable simply add latest product information, deactivate products that you no longer wish to display

- Save Designing, Printing & shipping Cost

- Easy to Carry on your laptop, so no need to carry bulky printed Catalog

- Not restricted by the number of products to be added, entire product line can be displayed

Local Currency
Add your regional currency symbol so that the product pricing in catalog is displayed in the respective currency

Display Offers & Promotions
Display promotional offers in screensaver within Xplore, so that it catches the eye of customers when the application is idle.

Runs on windows pc
